# PREFACE.

**H**EREWITH the complete ATLAS OF JOHNSON COUNTY is presented to its subscribers, and cheerfully commended to their favor. The work is the accomplishment of a task begun nearly one year ago. The desire to furnish a publication worthy of the approval and patronage of the public has prompted us from the outset. The citizens of Johnson County, especially those of Iowa City, have fulfilled our expectations by their liberal subscriptions, and it is now our only hope that our labors may receive the approbation which we naturally think they merit.

After beginning such a work, where there is so much uncertainty, it is gratifying in the end to receive the practical indorsement of all the leading business men and influential citizens in the County as this work has.

Beyond any question, the Atlas of Johnson County, for the territory of which it is descriptive, is the most complete volume ever published. The services of an average of six men for nearly one year have been required for its production. The immense labor, often almost bordering upon drudgery, which is involved in the preparation and search of data, besides the care, and worry, and expense, can only be comprehended by those experienced in similar undertakings. And yet it has been the author's aim to shirk no hardship and avoid no duty, to spare neither pains nor cost to make the result as complete and acceptable as possible. Records and plat books have not been found sufficiently reliable for our purpose. The statement may seem almost incredible, and yet we have personally examined every piece of farm land in the County, besides making innumerable actual surveys where boundaries have been in doubt or of irregular shape. Indeed, in the preparation of this book there is not a creek or road in the County to which we have not given our attention, in order that we might cure the many defects always to be found in the County records. We have estimated that we have travelled over four thousand miles in examining and viewing the component parts of the different districts, and townships and villages. A map of the World, United States and Iowa, the system of the United States land survey, with the road

laws, the directory of Johnson County farmers, and the business houses in County and City, are all believed to enhance the usefulness of a publication of this character.

We call special attention to the thorough and faithful work in the production of the Iowa City map with this volume. Its excellence is due to the careful and painstaking efforts of our Mr. Huebinger, a graduate in civil engineering, and who personally superintended and executed the work. This map is a direct copy from a large original which was recently purchased by the City Council.

It would, indeed, be ungrateful on our part, if we did not render thanks to those who have shown us so many valuable courtesies. In the course of one year there have been hundreds of people who have assisted us by furnishing information and data. It would be impossible to express our entire appreciation to each individual, and we must take this opportunity of thanking them, one and all. The various assessors, clerks and trustees of the different townships and villages, and particularly the County officers, have assisted us by so many kindnesses that we shall ever feel grateful towards them. Neither shall we forget those, who, by subscription and advertisement, have given us their encouragement.

With all the incessant toil and almost hardship involved, the preparation of this Atlas has not been without its pleasant side, and now that the work is done, we sincerely trust it will meet the general approval of the citizens of Johnson County, for whose special benefit it has been prepared. It is the first complete Atlas ever published of the County, and while we claim no gift of prophecy, we are bold enough to predict that it will be many years before another will be needed. With this statement we present our effort to the candid judgment of the public, and hope it will win some appreciation equal to the pride we take in it, and the satisfaction of its merit will be a gratification worth more than the money realized as a business venture.

# ANALYSIS OF THE SYSTEM OF UNITED STATES LAND SURVEYS

COPYRIGHT, 1890.

## METES AND BOUNDS.

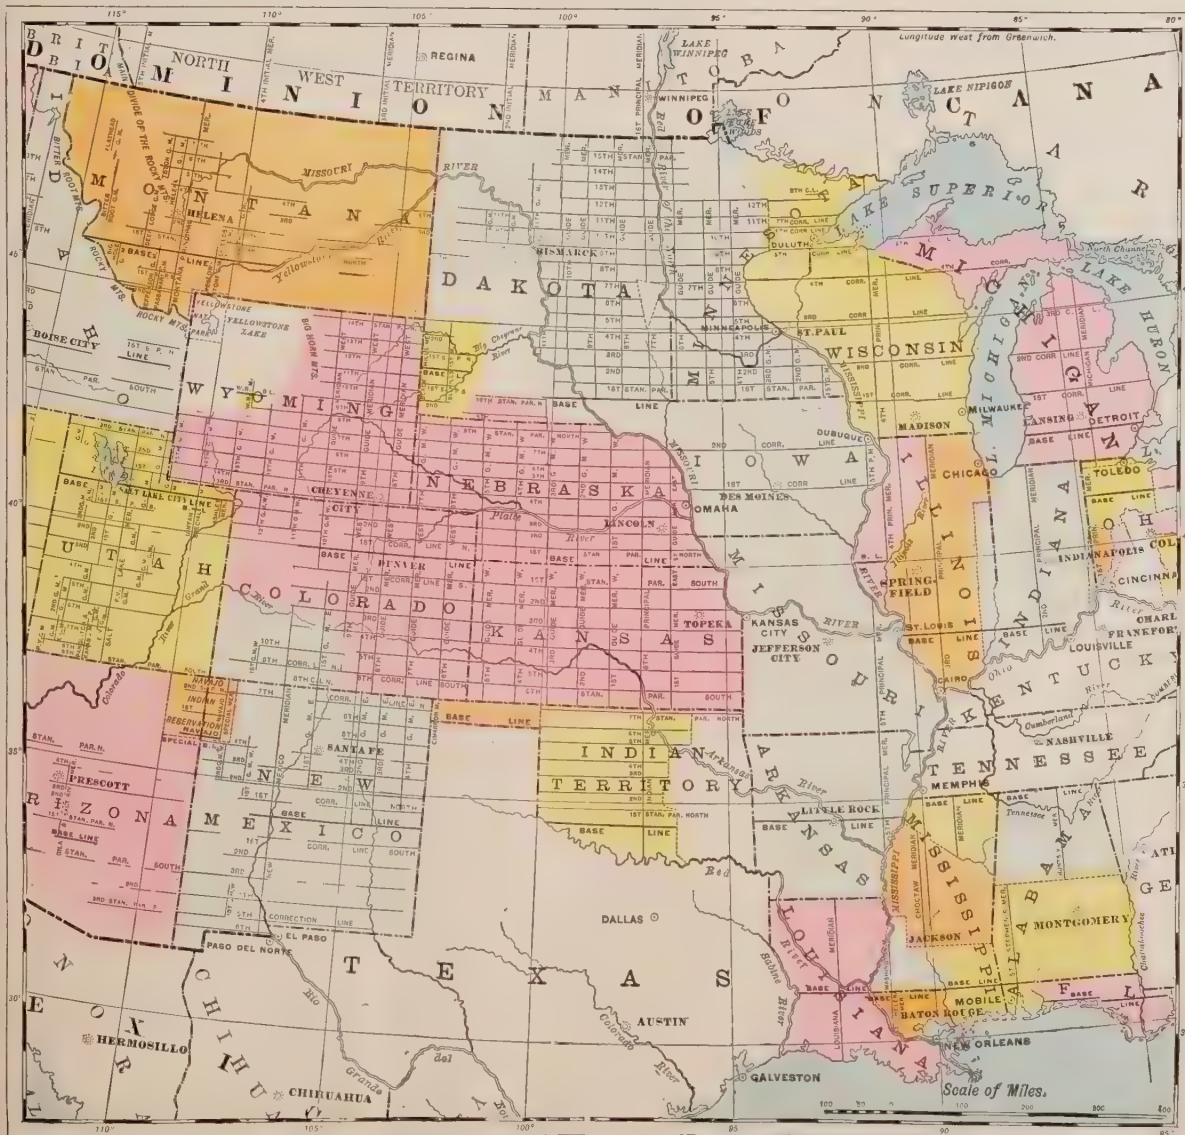

Up to the time of the Revolutionary War, or until about the beginning of the present century, land, when parcelled out, and sold or granted, was described by "Metes and Bounds," and that system is still in existence in the following States, or in those portions of them which had been sold or granted when the present plan of surveys was adopted, viz.: New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, North and South Carolina, Georgia, Tennessee, Kentucky, Texas, and the six New England States. To describe land by "Metes and Bounds," is to have a known land-mark for a place of beginning, and then follow a line according to the compass-needle (or magnetic bearing), or the course of a stream, or track of an ancient highway. This plan has resulted in endless confusion and litigation, as land-marks decay and change, and it is a well-known fact that the compass-needle varies and does not always point due North.

As an example of this plan of dividing lands, the following description of a farm laid out by "Metes and Bounds," is given: "Beginning at a stone on the Bank of Doe River, at a point where the highway from A. to B. crosses said river (see point marked C. on Diagram 1); thence 40° North of West 100 rods to a large stump; thence 10° North of West 90 rods; thence 15° West of North 80 rods to an oak tree (see Witness Tree on Diagram 1); thence due East 150 rods to the highway; thence following the course of the highway 50 rods due North; thence 5° North of East 90 rods; thence 45° East of South 60 rods; thence 10° North of East 300 rods to the Doe River; thence following the course of the river Southwesterly to the place of beginning." This, which is a very simple and moderate description by "Metes and Bounds," would leave the boundaries of the farm as shown in Diagram 1.

## MERIDIANS AND BASE LINES.

DIAGRAM 2.

THE present system of Governmental Land Surveys was adopted by Congress on the 7th of May, 1785. It has been in use ever since and is the legal method of describing and dividing lands. It is called the "Rectangular System," that is, all its distances and bearings are measured from two lines which are at right angles to each other, viz.,—  
These two lines, from which the measurements are made, are the Principal Meridians, which run North and South, and the Base Lines, which run East and West. These Principal Meridians are established, with great accuracy, by astronomical observations. Each Principal Meridian has its Base Line, and these two lines form the basis or foundation for the surveys or measurement of all the lands within the territory which they control.

Diagram 2 shows all of the Principal Meridians and Base Lines in the central portion of the United States, and from it the territory governed by each Meridian and Base Line may be readily distinguished. Each Meridian and Base Line is marked with its proper number or name, as are also the Standard Parallels and guide (or auxiliary) Meridians.

Diagram 3 illustrates what is meant when this method is termed the "Rectangular System," and how the measurements are based on lines which run at right angles to each other. The heavy line running North and South (marked A. A.) represents the Principal Meridian, in this case say the 66th Principal Meridian. The heavy line running East and West (marked B. B.) is the Base Line. These lines are used as the starting points or basis of all measurements or surveys made in territory controlled by the 66th Principal Meridian. The same fact applies to all other Principal Meridians and their Base Lines. Commencing at the Principal Meridian, at intervals of six miles, lines are run North and South, parallel to the Meridian. This plan is followed both East and West of the Meridian throughout the territory controlled by the Meridian.

These lines are termed "Range Lines." They divide the land into strips or divisions six miles wide, extending North and South, parallel with the Meridian. Each division is called a Range. Ranges are numbered from one upward, commencing at the Meridian; and their numbers are indicated by Roman characters. For instance, the first division (or first six miles) west of the Meridian is Range I, West; the next is Range II, West; then comes Range III, IV., V., VI., VII., and so on, until the territory governed by another Principal Meridian is reached. In the same manner the Ranges East of the Meridian are numbered, the words East or West being always used to indicate the direction from the Principal Meridian. See Diagram 3.

Commencing at the Base Line, at intervals of six miles, lines are run East and West parallel with the Base Line. These are designated as Township Lines. They divide the land into strips or divisions six miles wide, extending East and West, parallel with the Base Line. This plan is followed both North and South of the Base Line until the territory governed by another Principal Meridian and Base Line is reached. These divisions or Townships are numbered from one upward, both North and South of the Base Line, and their numbers are indicated by figures. For instance: The first six mile division north of the Base Line is Township 1 North; the next is Township 2 North; then comes Township 3, 4, 5, and 6, North, and so on. The same plan is followed South of the Base Line: the Townships being designated as Township 1 South, Township 2 South, and so on. The "North" or "South" (the initials N. or S. being generally used) indicates the direction from the Base Line. See Diagram 3.

These Township and Range Lines, crossing each other, as shown in Diagram 3, form squares, which are called "Townships" or "Government Townships," which are six miles square, or as nearly that as it is possible to make them. These Townships are a very important feature in locating or describing a piece of land. The location of a Government Township, however, is very readily found when the number of the Township and Range is given, by merely counting the number indicated from the Base Line and Principal Meridian. As an example of this, Township 8 North, Range 4, West of the 5th Principal Meridian, is at once located on the square marked ★ on Diagram 3, by counting eight tiers north of the Base Line and 4 tiers west of the Meridian.

## TOWNSHIPS OF LAND.

TOWNSHIPS are the largest subdivisions of land run out by the United States Surveyors. In the Governmental Surveys Township Lines are the first to be run, and a Township Corner is established every six miles and marked. This is called "Townshiping." After the Township Corners have been carefully located, the Section and Quarter Section Corners are established. Each Township is six miles square and contains 36 square miles, or 23,040 acres, or 36 square miles, as near as it is possible to make them. This, however, is frequently made impossible by: (1st) the presence of lakes and large streams; (2nd) by State boundaries not falling exactly on Township Lines; (3rd) by the convergence of Meridians or curvature of the earth's surface; and (4th) by inaccurate surveys.

Each Township, unless it is one of the exceptional cases referred to, is divided into 36 squares, which are called Sections. These Sections are intended to be one mile, or 320 rods, square and contain 640 acres of land. Sections are numbered consecutively from 1 to 36, as shown on Diagram 4. Beginning with Section 1 in the Northeast Corner, they run West to 6, then East to 12, then West to 18, and so on, back and forth, until they end with Section 36 in the Southeast Corner.

Diagram 4 shows a plat of a Township as it is divided and platted by the government surveyors. These Townships are called Government Townships or Congressional Townships, to distinguish them from Civil Townships or organized Townships, as frequently the lines of organized Townships do not conform to the Government Township lines.

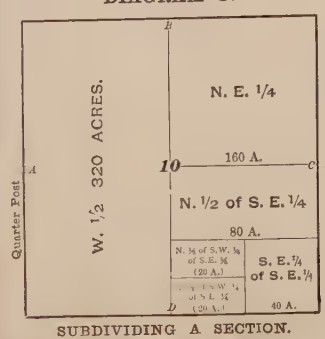

## SECTIONS OF LAND.

DIAGRAM 5 illustrates how a section may be subdivided, although the Diagram only gives a few of the many subdivisions into which a section may be divided. All Sections (except fractional Sections) are supposed to be 320 rods, or one mile, square and therefore contain 640 acres—a number easily divisible. Sections are subdivided into fractional parts to suit the convenience of the owners of the land. A half-section contains 320 acres; a quarter-section contains 160 acres; half of a quarter contains 80 acres, and quarter of a quarter contains 40 acres, and so on. Each piece of land is described according to the portion of the section which it embraces—as the Northeast quarter of Section 10; or the Southeast quarter of the Southeast quarter of Section 10. Diagram 5 shows how many of these subdivisions are platted, and also shows the plan of designating and describing them by initial letters as each parcel of land on the Diagram is marked with its description.

As has already been stated, all Sections (except Fractional Sections which are explained elsewhere) are supposed to contain 640 acres, and even though mistakes have been made in surveying, as is frequently the case, making sections larger or smaller than 640 acres, the Government recognizes no variation, but sells or grants each regular section as containing 640 acres "more or less."

The Government Surveyors are not required to subdivide sections by running lines within them, but they usually establish Quarter Posts on Section Lines on each side of a section at the points marked A, B, C, and D, on Diagram 5.

DIAGRAM 5.

SUBDIVIDING A SECTION.

DIAGRAM 4

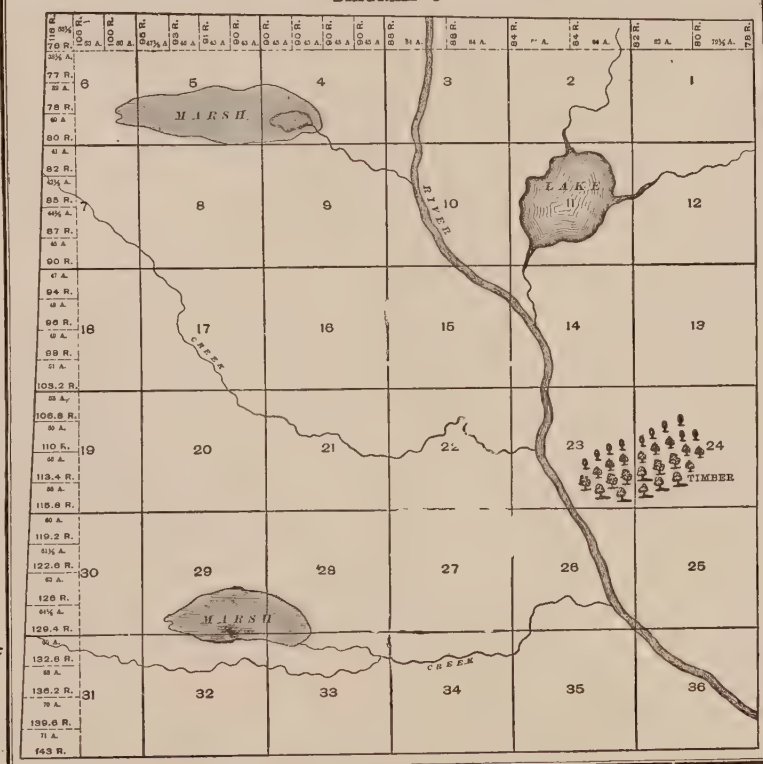

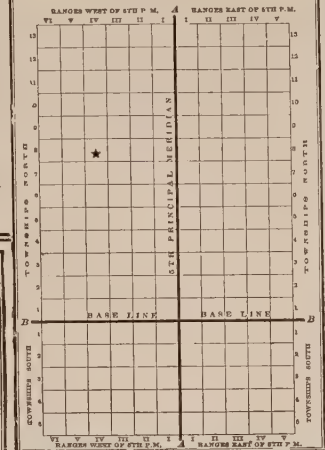

DIAGRAM 3

## FRACTIONAL PIECES OF LAND.

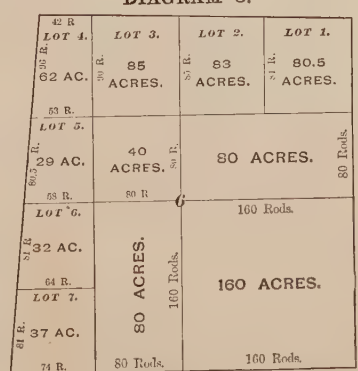

CONGRESSIONAL Townships vary considerably as to size and boundaries. Mistakes made in surveying and the fact that Meridians converge as they run North cause every Township to vary more or less from the 23,040 acres which a perfect Township would contain. See Diagram 4. In arranging a Township into Sections all the surplus or deficiency of land is given to, or taken from, the North and West tiers of Sections. In other words, all Sections in the Township are made full—640 acres—except those on the North and West, which are given all the land that is left after forming the other 25 Sections.

Diagram 4 illustrates how the surplus or deficiency is distributed and the Sections it affects. It will be seen that Sections 1, 2, 3, 4, 5, 6, 7, 18, 19, 30 and 31, are the "Fractional Sections," or the Sections which are affected if the Township overruns or falls short. Inside of these Fractional Sections, all of the surplus or deficiency of land (over or under 640 acres) is carried to the "forties" or "eighties" that touch the Township Line. These pieces of land are called "Fractional Forties" or "Fractional Eighties," as the case may be. Diagrams 4 and 6 show the manner of marking the acreage and outlining the boundaries of these "Fractions."

Diagram 6 illustrates how the surplus or deficiency of land inside of these Sections is distributed and which "forties" or "eighties" it affects. From this arrangement it will be seen that in any Section that touches the North or West Township Lines, the Southeast Quarter may be full—160 acres—while another quarter of the same Section may be much larger or smaller.

Frequently these fractional "forties" or "eighties" are lotted as shown in Diagram 6. They are always described as fractional tracts of land, as the "fractional S. W. 1/4 of Section 6," etc. Of course those portions of these Sections which are not affected by these variations are described in the usual manner—as Southeast 1/4 of Section 6. As a rule Townships are narrower at the North than at the South side. The Meridians of Longitude (which run North and South) converge as they run North and South from the Equator. They begin at the Equator with a definite width between them and gradually converge until they all meet at the poles. Now, as the Range Lines run North and South, it will at once be seen that the convergence of Meridians will cause every Congressional Township (North of the Equator) to be narrower at its North than at its South side, as stated. See Diagram 4. In addition to this fact, mistakes of measurement are constantly and almost unavoidably made in running both Township and Range lines, and if no new starting points were established the lines would become confused and unreliable, and the size and shape of Townships materially affected by the time the surveys had extended even a hundred miles from the Base Line and Principal Meridian. In order to correct the surveys and variations caused by the difference of latitude and straighten the lines, "Correction Lines" (or Guide Meridians and Standard Parallels) are established at frequent intervals, usually as follows: North of the Base Line a Correction Line is run East and West parallel with the Base Line, usually every twenty-four miles. South of the Base Line a Correction Line is usually established every thirty miles. Both East and West of the Principal Meridian "Correction Lines" are usually established every 48 miles. All Correction Lines are located by careful measurement, and the succeeding surveys are based upon them.

IOWA CITY, IOWA

THE IOWA CITIZEN, \$1. PER YEAR  
\$1.25 IF NOT PAID IN ADVANCE

**Book and Job Printers.**

THE IOWA CITIZEN is a weekly newspaper. All the reading matter is prepared exclusively for it. It is not made up of clippings from a daily edition. It is the only Weekly Newspaper in Iowa City, and therefore it is the best advertising medium in the County. It has the largest circulation and is the official County paper.

**The Job Printing Department**

is equipped to turn out fine work on short notice.

Cardinal K 52723, son of the great Ellerslie Wilkes, was foaled on May 16th, 1894. He is a handsome black horse with white hind heels, stands 16 hands high, and weighs 1,000 pounds. He was bred by A. A. Kitzmiller, Valley Junction, Iowa.

In conformation he is a model horse of fine finish and disposition. He is abundantly supplied with bone and muscle, feet and legs are of the best quality. He has deep strong shoulders, stout back, very strong loins and stifles. In every respect he is a great horse. He is bred in the most fashionable producing lines, and while he has not been tracked, he can show lots of speed. His blood lines are the best. Cardinal K is sired by Ellerslie Wilkes (2:22 1/4) by George Wilkes (2:22), by Hambletonian 10. First dam Nauverie (dam of Butte 2:30) by Messenger Chief 1821; second dam Alexena, by Joe Downing 710; third dam Zone (thoroughbred) dam of the good racers, June and Mexico. The Wilkes family is the greatest family of trotters and pacers on earth. It contains the performers John R. Gentry, (2:00 1/4) Joe Patchen, (2:10 1/4), Frank Egan (2:33 1/4), Online (2:04); Rubenstine (2:05 1/4) Bumps (2:04 1/4); George Wilkes (2:22) winner of 50 heats in 2:30, is the sire of 16 in 2:13 1/4 to 2:20, and 84 in 2:30. On his dam's side he has a solid foundation in thoroughbred stock which gives to him those staying qualities so indispensable to a great race horse.

Any further information in regard to Cardinal K will be cheerfully given if addressed to JOHN J. KOST, Iowa City, Iowa.

VISITORS ALWAYS  
WELCOME.

**SAIDA, 1391.**  
"THE PRIDE OF THE WEST."

Sired by Perfection ; he by Banyuls, out of Charlotte, by Page.

The sire of more challenge champions and first prize winners at the Great Shows than any stallion living or dead.

Dam ; Serieuse, winner of first prize at Universal Exposition at Paris, 1889.

Awarded Gold Medal by Minister of Agriculture.

Winner of First Prize at Concours of Le Pin, 1890.

Winner of First Prize in class, World's Columbian Exposition, 1893.

Winner of First Prize, with colt by her side, at World's Columbian Exposition, 1893.

Winner of First Prize with Saida by her side, at Chicago Horse Show, 1894.

Winner of championship over all Coach and Carriage breeds of same age and sex.--Hackneys, German Coachers, Cleveland Bays, Trotters and Thoroughbreds competing, Chicago Horse Show 1896; and many other first and second prizes have been taken at Iowa, Illinois, Michigan and Wisconsin State Fairs.

Such mares as Saida, Principe, Sabine, Payotte and Julia have found their home at the

MAPLE LEAF STOCK FARM.

Recognizing from the very start that mares and stallions of extreme quality must be used, Mr. Halter made up his mind to buy the best and choicest that money could procure. Naturally, he had to pay long prices for them, but he willingly gave them, believing that for his foundation, stock of the best was none to good.

**MARCUS HALTER,**

## SKETCH OF IOWA.

France first claimed the territory now embraced in the State of Iowa, in 1763 it was ceded to Spain. October 1, 1800, re-ceded to France. April 30, 1803, ceded with other territory to the United States. October 31, 1803, a temporary government was authorized by Congress for this new territory. October 1, 1804, it was included in the District of Louisiana, and placed under the jurisdiction of the territorial government of Indiana. July 4, 1805, it was incorporated with the Territory of Louisiana, which then had a territorial government. June 4, 1812, it was embraced in the territory of Missouri. June 28, 1830, it became part of the territory of Michigan. July 3, 1836, it was incorporated with the territory of Wisconsin. July 12, 1838, it was included in and constituted a part of the new Territory of Iowa. December 28, 1846, admitted into the Union as a State.

The meaning of the word "Iowa" is in doubt. One legend runs that an Indian tribe, journeying westward, came to the Mississippi River, and as they saw the broad green prairies on the opposite shore, they exclaimed, "Iowa," meaning the "beautiful land."

Another legend says, that a band of red men, hard pressed by the encroachments of the whites, debarked from their birchen canoes on the western bank of the Great River, their chief exclaiming as he did so, "Iowa," meaning "Here we rest." The first of these legends seems to be the most generally accepted, and the weight of acceptance is in its favor. Its fitness will cause it

to outlast any other definition of the word that has been or may be given.

The immense resources and natural attractions of the western country, the vast increase of wealth, population, and influence in the new states, have long been and are, particularly at the present time, topics of great interest throughout the whole republic, and have long been interesting, not only to our citizens, but the inhabitants of foreign countries. Such are the admirable facilities of the West for trade, such the variety and fertility of the soil, the number and excellence of its natural products, the genial nature of its climate, and the rapidity with which its population is increasing, that it has become an object of the deepest interest to every American heart. To this country the speculator has been attracted by the increasing value of property. The politician anticipates the time when, through the ballot box, the West shall rule, the young and enterprising, turning from the eager competition of industry and talent in the older states, see here a less occupied field for action.

A single glance at the map of the United States will show that the direction of our government will shortly be in the hands of the people of the West. The thirteen old states have an area of about 390,000 square miles, while only eight of the new ones have about the same, and the whole region stretching westward to the Pacific Ocean contains not less than 1,700,000 square miles of territory.

No state in the western country has elicited so many inquiries from those who desired to avail themselves of a settlement in a new and rising country as that of Iowa, and none has filled up so rapidly with an industrious and intelligent population from every part of this great country.

This state is undoubtedly the richest in soil of any in the Union, and, of course, holds out the greatest prospect of advantage to the agriculturist. If rural pursuits are pleasant or profitable anywhere in our country, they must be peculiarly so in Iowa, for here the produce of the farmer springs up almost spontaneously, not more than one-third the labor being necessary on the farms here that is required on those in the East.

To be able to judge of the extent and power of vegetation in this region one must reside here through the summer and observe with what luxuriance and vigor the vegetable creation is pushed on, how rapidly the grain and fruit grow, and what a depth of verdure the forests assume. This state, having a vast extent of the most fertile land, must, of course, raise, with the greatest ease, all the articles to which her soil and climate are favorable. By her long line of coast on the Mississippi, never hindered from being navigable by the lowness of water, Iowa has facilities for conveying her products, which the states situated on the Ohio do not enjoy. From her immense prairies and boundless summer ranges for stock, she has advantages for raising cattle and other stock superior to those of the remaining western districts.

## HISTORY OF JOHNSON COUNTY.

Johnson County extends eastward and westward from the east line of Range V, to the west line of Range VIII, west of the 5th principal meridian and north, and south from Township 77 to Township 81, north, both inclusive. There is but one civil Township in 77, viz. Fremont, which is added to the southeast corner of what would otherwise be a county 24 miles square.

Johnson County is joined on the east by Cedar and Muscatine Counties; on the south by Louisa and Washington Counties; on the west by Iowa (formerly Keokuk) County, and on the north by Linn County.

The southeastern part of the county drains into the Cedar river, whereas all the balance drains into the Iowa river, which, in Louisa County, flows into the Cedar river.

The portions traversed by the Iowa river, which runs nearly due east across the county through Township 80, and Ranges VI., VII., and VIII., and then nearly due south from Township 80 to the southern boundary of the county, as well as along some of its larger tributaries, among which are Ralston's and Old Man's creeks, the land is quite rough, but along the southern and eastern portions which forms the divide between the Cedar and Iowa rivers, the land is rich and level. In former times a large portion of this territory was swampy, but by judicious ditching and tilting nearly all of this land has been effectually drained and produces very large crops. This especially applies to Fremont, Lincoln, Scott, and Pleasant Valley Townships.

Johnson County was created by an act of the Territorial Legislature in 1837, and a few months later Napoleon was made the county seat. It would be very difficult, at present, to locate the once county seat unless some old time citizen would point it out. There was only one court session held there, and in 1839 Iowa City was selected the judicial seat.

Iowa was formerly a part of the Territory of Wisconsin. When it was made a territory, Iowa City was selected as the seat of government. A large number of speculators and squatters flocked to Johnson County. As the desirable lands were at that time still owned by the Indians although the treaty by which they ceded them to the United States was made but not yet ratified, the first settlers found it necessary to protect themselves against land grabbers and did so very effectively by organizing what they termed Claim Associations.

The early settlers were themselves squatters and illegally occupying the lands they claimed. They had no patent or title and could not claim protection from the United States government. Still they had settled in good faith upon the lands, improved them, and were determined to hold them against all new comers. Each township therefore organized a land club which formed a part of the Claim Association, whose jurisdiction extended over a large portion of the western country.

The maximum amount of land any one person could hold was fixed by the Claim Committee, and from its decision there was no appeal. Disobedience was punished in some cases with the lash or a thorough application of a coat of tar and feathers. The land so allotted was staked off so that the boundaries were well defined, the respective parties continued the cultivation until the land was offered at public sale by the government.

These claims were all properly filed and platted, and on the day of sale some prominent party was selected to do the bidding for the whole community. He would bid the minimum price, \$1.25 per acre, and always secure the land. Should an outsider have attempted to increase the bid, he stood every chance of being torn into shreds, as all the members of the Claim Association had sworn to faithfully perform their duty, that is to prevent any one else from securing the lands they claimed. Newcomers, however, were welcomed and had chances to secure other lands and were well satisfied with the doings of the land clubs. The original boundaries of Johnson County included what is now Iowa County, and for a time was a part of Cedar County.

The first public officer in Johnson County was Samuel C. Trowbridge, who was appointed Sheriff by Henry Dodge, the then Governor of Wisconsin. The first entry in the Clerk's record book of Johnson County bears date of March 26th, 1839, and refers to the official seal of the county, which was to be the eagle side of a dime until another could be secured.

This meeting, apparently, was held at Napoleon, but on October 7th, 1839, the Court removed to Iowa City. In December of that year the Commissioners selected the N. W. ¼, Sec. 15, Twp. 79, Range 6, West of the 5th Principal Meridian, and the same is now known as County Seat Add. to Iowa City.

Big Grove Township was the first civil township organized, on April 9th, 1845, Cedar, Clear Creek, Liberty, Lucas, Monroe, Newport, Perry, Pleasant

Valley, Scott, Washington, and Iowa City, following in 1846. Since then numerous changes have taken place so that at present there are 20 civil townships.

The first county officers were: Samuel C. Trowbridge, Sheriff, 1838; Luke Douglas, Clerk, 1839; Wheaton Chase, Treasurer, 1839; L. P. Hamilton, Recorder, 1839; Pleasant Harris, County Judge, 1839; Cyrus Sanders, Surveyor, 1839; John Hawkins, Coroner, 1839; Robert G. Roberts, Representative, 1838; Chas. Whittlesley, Senator for Johnson and Cedar.

The above were Territorial Officers, Iowa being admitted as a State on December 28th, 1846. The first session of the District Court was held on the second Monday in May, 1839, at the Gilbert Trading House, a few miles from Napoleon, the county seat, it being the only place available.

Judge Williams, of Bloomington (now Muscatine), presided. Theodore S. Parvin acted as prosecuting attorney. The first jail was erected on what is now Clinton street near Prentiss, and cost about \$1,600. It has long since disappeared, and the county has just completed a modern and up-to-date jail, warranted to keep safely any person enclosed within its walls. The first court house was built in 1843. Another was built in 1854 with the jail in the basement. This was lately torn down and a new court house suitable to the demands of the county is now being constructed and will probably be finished this year. Judging from drawing and plans submitted, it will be a fine structure, both fire and burglar-proof, and containing all the conveniences necessary in a modern public building.

The county is crossed by the Iowa river and numerous large streams which in early days had to be ferried when the water was high, and in some places could be forded when the water was low. The first ferry was located near the mouth of Ralston Creek, and was operated by one Benjamin Miller during the winter-spring of 1838-1839. Andrew D. Stephen secured a franchise to operate a ferry over the Iowa river at the point where National road crosses, and T. A. A. Cables secured the franchise of the Miller ferry who had since died. Both these franchises were granted in 1840. A ferry at Iowa City was also established in the same year.

Today Johnson County can boast of being the best bridged county in the state. The Iowa river is crossed by six iron bridges and one in the lower part of Fremont Township contracted for. Nearly all the larger creeks are crossed by iron bridges, all substantial structures, and what few wooden bridges still remain will soon be replaced by permanent structures. The county appreciates the fact that money is saved by erecting permanent structures in place of temporary ones, which cost more to keep in repair than good bridges cost originally.

Nearly all through roads are in good condition the year around, although in some parts of the county the heavy gumbo soil has made it very difficult to keep roads in good repair. The by-roads of course are in more or less need of attention, some of them indeed being impassable at times.

Like nearly all the counties organized before the advent of railroads, Johnson County paid dearly for its effort to secure railroad facilities. To go into the history of this matter in detail would lead us too far. Suffice it to say that the people of Johnson County were willing at all times to assist in new enterprises that apparently would help to increase the population and the wealth of the community, and voted taxes to aid such enterprises, especially railroads, and all they have to show for it is the C. R. I. & P. R. R. giving them connections east and west, and the B. C. R. & N. R. R. with accommodations north and south. Still they should console themselves that they are no worse off than other counties, and at least have something to show for their troubles, whereas other counties have voted taxes and have no railroad but only the debt.

The total railroad tax voted in Johnson County, which after a great deal of litigation had to be paid, amounted to \$109,000, and the interest and costs of litigation increased this amount to over \$150,000. But, as before stated, some of the other counties fared even worse.

How the county has grown is best illustrated by the assessments of the various decades. The first valuation of the entire county, in 1838, aggregated \$9,700, and the taxes collected to \$46.74. The total receipts from April 1st, 1841, to May 3d, 1842, were \$2,500.96. The first available report following the above is for the term from September 15th, 1850, to January 1st, 1861, and shows receipts for fifteen and one-half months aggregating \$10,520.63. For the year 1879, it amounted to \$146,069.90; 1889, \$206,782.60; 1899, \$264,507.57. We also add the total assessed valuation of the county for 1850, 1890, and 1899,

showing the increase by decades, and also the totals of townships for 1900 showing taxable value: 1890, \$7,306,661; 1890, \$9,045,978; 1899, \$7,459,752. 1890 and 1890 taxes were based on one-third valuation, whereas 1899 is based on one-fourth. Cedar, \$288,090; Big Grove, \$312,750; Jefferson, \$184,550; Monroe, \$194,140; Oxford, \$360,800; Hardin, \$233,830; Madison, \$155,500; Penna, \$169,450; Clear Creek, \$271,010; Newport, \$141,000; Graham, \$335,400; Scott, \$459,000; East Lucas, \$231,390; West Lucas, \$231,190; Union, \$287,120; Washington, \$458,620; Sharon, \$175,350; Pleasant Valley, \$164,770; Lincoln, \$245,720; Liberty, \$196,530; Fremont, \$343,550; Solon, \$53,300; Oxford, \$80,530; Lone Tree, \$65,510; Iowa City, \$1,627,210.

On the whole, the value of the lands in Johnson County, as well as in the city and towns, is daily increasing in value, and in but few counties of the state will farm land bring as high an average price per acre as here.

The population is composed of people of all nationalities, Bohemians and Germans predominating among those of foreign birth, and those of American birth are largely from Ohio and Pennsylvania, although quite a number of settlers are from the south, rather more so than in other counties in eastern Iowa. But they are all quite agreeable, industrious, and mostly well to do.

In the townships of Sharon and Washington there is a settlement of Amish, which, including those in the adjoining counties of Iowa and Washington, have nearly 800 communicants and a population of over 1,500. They form four districts known as the Upper Deer Creek, Lower Deer Creek, South Sharon, and North Sharon, and the Warcey branch, the latter having a church in section 31, Sharon Township. The officers of Lower Deer Creek district, with a church a short distance northwest of the village of Amish, are at present J. F. Schwartz, endruber, bishop, and John Gunder, David Reber, Jos. Gingerich, ministers. Upper Deer Creek district has a church in the southeastern part of Iowa County, of which W. K. Miller is bishop, and Noah Yoder and Gideon Yoder ministers. North and South Sharon district have no churches but meet at the residences of the different ministers or ministers. C. J. Miller is bishop of South Sharon, and Peter Brennenman and Jonathan Plank ministers, whilst the North Sharon district is presided over by Peter Kinsinger, bishop, and J. J. Plank and Henry Hershberger ministers. The Warcey branch has a church in Sharon Township and Chris Warcey is bishop, and A. L. Yoder minister.

The Amish are the true Mennonites, still strictly adhering to the doctrines of Mennon Simon, the founder of the sect, who lived contemporaneously with Luther, Melancthon, Calvin, Zwingle. All these reformers and their followers differed more or less on minor matters. The Mennonites drew up articles of faith and ratified the same at Dort, in 1662, the main feature of which is that they will follow the teachings of the bible as closely as possible and abstain from formalities. Their most striking difference from other protestant organizations are these: They believe only in baptism by sprinkling when the applicant has proven his or her worthiness of becoming a member of the church. They object to taking an oath, object to military duty or any forcible resistance to a wrong, object to office holding and a paid ministry.

No one is admitted to communion who has committed any wrong, and shunning members found guilty of any wrong-doing by not allowing anyone to associate with him. They reject all revenge, going even so far as to deny members to go to law to redress a wrong or settle differences. They also disbelieve in divorce and encourage early marriages. These were the essential doctrines of the Mennonite church as adopted in 1632, but in the course of time deviation from this doctrine had occurred and the Mennonites became divergent in their views.

Jacob Ammi, a native of Switzerland in 1693, was founder of the present Amish society. Their motto is to do as you would be done by and avoid all extravagance in dress and habits, and to be good and kind in little things, and from our acquaintances and intercourse with those residing in Pennsylvania and Johnson county, we can frankly state they do not only preach this doctrine but live strictly up to it.

Owing to the persecutions all branches of the Mennonites were subjected to in Europe, with their doctrines of non-resistance, they suffered great hardships. Quite a number were induced by Wm. Penn and his agents to emigrate to America and the first settlements were made at Germantown as early as 1688, and a great portion of the prosperity of the state can be credited to the thrifty, economical, peaceful Dutch, Swiss, and German Amish and their descendants.

Among the arrivals before the revolutionary war we find the names of

Wm. Rittenhaus, T. D. Pastorius, and Jacob Telner, all of whom gave their support to the continental government. The communities in Pennsylvania increased rapidly and early in the 19th century, they occupied lands in Maryland, Virginia, and Ohio.

In the summer of 1840 a party of Amish from Somerset County, Pennsylvania, made a tour of the west, intending to select a location for an Amish settlement. They came by boat down the Ohio river and up the Mississippi to Burlington, and traversed a large portion of eastern Iowa on foot and examined the land in the neighborhood of Iowa City and were pleased with it, but on their return trip via Cedar Rapids, Clinton, Chicago, and Elkhart, Ind., they selected a site near Goshen, Ind. Another party, however, settled at West Point, near Keokuk, Iowa, in the same year, and they and their descendants have been largely instrumental in developing the resources of Lee County.

In 1845 David P. Guengerich from Ohio, and Joseph J. and Peter Schwartzendruber from Maryland, paid a visit to the settlement at West Point and were well received, but owing to a doubt as to the title to the land which they had decided upon, they moved farther north, and located land near the present village of Amish, 16 miles southwest from Iowa City. They went on foot to Dubuque to enter the land and in the spring of 1846 Daniel P. Guengerich, Wm. Wertz and others with their families located near Amish in November of the same year. Peter Miller from Knox County, Ohio, also settled in the same neighborhood.

In 1851 Elder Jacob Schwartzendruber and his sons, Chris, George and Fred, the latter with a family, arrived. When these settlers first arrived they were not well received, quite a number believing that they would become a burden to the community, but this did not last long. By their quiet, unassuming ways they have won the regard of all who have become acquainted with them. As for being a burden, they constitute today the wealthiest class in the county. In fact no one having occasion to visit the Amish settlement can fail to be impressed with the quiet, self-complacent mode of living, their love of piety and scrupulous cleanliness, both in person and in and around the house and the deference shown by the children, whether young or old, to the wishes of their parents. The neat and clean habits of both men and women, entirely wanting in any kind of ornamentation, may seem odd to some persons, but is very becoming and the uniformly quiet, cheerful demeanor makes a visit to the home of an Amish family a rare treat. Nearly all, both old and young, speak German well, although the Pennsylvania Dutch is the prevailing dialect spoken.

The Amish all intermarry and as a consequence the lands once acquired remain in the colony. As their prosperity increases they are continually adding to their already large possessions.

By a method of loaning to the needy at a low rate of interest they succeed in making the younger generation self-supporting and keep them in the settlement.

As a consequence we find among the residents numerous descendants of the earliest settlers, and the Schwartzendrubers, Gingerichs, Millers, Hostetters, Kinsingers, Yoders, and their descendants own a large part of the property in both Sharon and Washington Townships. The Amish are a class of citizens of which any county can justly feel proud and who, wherever they have settled have done much to improve the country.

There are other settlements in various parts of the United States, notably in Pennsylvania and Maryland, Ohio, Indiana, Minnesota, Kansas and Nebraska. The new United States census being now in preparation, we will not attempt to estimate the total number of Amish in the United States, but a rough guess would place them at not less than 60,000 communicants, and a population of 150,000.

The immigration to this settlement has for years been very limited, yet they have increased wonderfully, having succeeded in retaining nearly all their descendants, by carefully training their children and winning them for their church. As their settlement is getting crowded they keep expanding the same. Some of the more resolute emigrate and start new settlements in other counties and states, expecting others of their friends and relatives to follow, all being devoted to the ways and teachings of the mother church and looking to them for assistance. Comparatively few converts are received from outside.

Johnson county wields quite a power in the politics of the state, and several persons of national reputation spent their early days in Johnson County. Among them Samuel J. Kirkwood, the famous war governor, and later Secretary of the Interior, and the celebrated railroad attorney, Wm. Penn Clarkson, of Washington, D. C., both now deceased.

The educational facilities of the county are of the best, there being in addition to the county school, two township high schools.

The shipping facilities for all parts of the county are also very good, and in no case is it necessary for the farmer to drive long distances to secure a market. Elevators and stockyards are located at all the small stations, and some even in the smaller interior towns. The shipments of grain and stock from Solon, Oxford, Lone Tree, and other points are very large.

Quite a number of rural mail routes have been established lately, so that the farmer can get his morning paper and other mail nearly as soon as if he lived in town, and having the additional advantage of rural life and lower taxation.

**AMISH** a town of 80 inhabitants, in Washington Township, 12 miles south from Oxford, the nearest banking town, and 8 miles north of Wellman, the nearest railroad station. Daily mail by stage from Wellman. It has two general stores, a blacksmith shop, feed mill, and saw mill.

**BOX ACCORD OR SOUTH LIBERTY**, a town of 100 inhabitants, three miles west of Hills Siding, the nearest railroad station, eight miles south of Iowa City, the nearest banking point. It has one general store, postoffice, blacksmith shop, and feed mill.

**CHASE**, a county postoffice in Madison Township, eight miles north of Oxford, the nearest banking town and railroad station.

**CORALVILLE**, a town on the Iowa river, two miles west of Iowa City, the county seat. It has a flour mill, blacksmith shop, hotel, two general stores, and the power plant of the Sperry Electric Light Co. Population, 350.

**ELMIRA**, a station on the B. C. R. & N. R. R., and the junction point of the main line and the Davenport, Clinton & Iowa City division. No town, Postoffice name, Ives.

**FRANK PIERCE OR WILLIAMSTOWN**, a postoffice in Washington Township, twelve miles southwest from Iowa City, the nearest banking town, and seven miles north of Kalona, the nearest railroad station. Population, 50. One general store and blacksmith shop.

**GRAHAM**, a railroad station on the Iowa City branch of the B. C. R. & N.

R. R. in Scott Township. No buildings, only a platform.

**HILL'S SIDING**, a station on the B. C. R. & N. R. R. in Liberty Township, six miles south of Iowa City. Postoffice, two general stores, creamery and blacksmith shop. Population, 175.

**LONE TREE**, an incorporated town on the Muscatine branch of the B. C. R. & N. R. R., sixteen miles southeast of Iowa City, twenty-two miles west of Muscatine. Has bank, numerous stores, two lively barns, elevator, opera house, and for a town of its size a splendid graded school and a weekly newspaper. The grain and stock shipments are very heavy and the town draws its trade from portions of Louisa and Washington Counties as well as from the southern part of Johnson County. When the new bridge across the Iowa river, now contracted for, in the southwestern part of Fremont Township is completed it will no doubt very much increase the trade of Lone Tree, at least it would be worth while for the business men of the town to make an effort to secure it.

The farmers in the townships tributary to Lone Tree are among the most prosperous in the county, and do most of their trading near home.

**MIDWAY**, a day railway station on the C. R. I. & P. R. R. between Iowa City and Downey.

**MORFORDSVILLE**, formerly a postoffice in Lincoln Township, ten miles south of Iowa City.

**MORSE**, a town on the main line of the B. C. R. & N. R. R., eight miles northeast of Iowa City. Population, 150. It has a drug store, two general stores, blacksmith shop, hotel, lumber yard, and elevator.

**NORTH LIBERTY**, a town of 150 population, located in Penn Township, eight miles northwest of Iowa City the nearest banking point and railroad station. It has two general stores, a saw mill, creamery, wagon and blacksmith shop, two churches, and a very fine school building.

**OXFORD**, an incorporated town of 1,000 inhabitants, located on the main line of the C. R. I. & P. R. R., 252 miles west of Chicago. It has two banks, one school, four churches, an opera house, three hotels, two elevators, and a feed mill. It has a fine waterworks and a volunteer fire department. It has a large number of stores of all kinds and is doing a prosperous business. The township is rolling and best adapted to stock raising, nearly all of the productions of the township as well as adjoining ones, are shipped from this point. In fact more grain and stock is shipped from Oxford than from Iowa City. During the past few years Oxford has gained considerably in population, and will no doubt continue to grow. The town was laid out by C. S. Wilcox in 1869 or 1870, and since then several additions have been added.

**RIVERSIDE**, a station on the Muscatine branch of the B. C. R. & N. R. R., twenty-six miles west of Muscatine, and twelve miles south of Iowa City, in Fremont Township. Lone Tree and Riverside respectively four and one-half and four miles distant, furnish banking facilities. It has three general stores, a lumber yard, facilities for handling grain and stock. Directly west of the town is a wagon bridge crossing the Iowa river.

**SHARON CENTRE**, a village in Sharon Township, ten miles southwest of Iowa City, the nearest banking point, and eight miles north of Kalona, the nearest shipping point. It has a general store and a blacksmith shop.

**SHOO FLY**, a postoffice in the southern part of Fremont Township.

**SHEEYVILLE**, a village of 150 inhabitants in Jefferson Township, sixteen miles northwest of Iowa City, three and one-half miles west of Ely, the nearest shipping point, and ten miles south of Cedar Rapids, the nearest banking point. It has a postoffice, and general store, two blacksmith shops, a church, and two schools, one of which is a high school.

**SOLOH**, an incorporated village in Big Grove Township on the main line of the B. C. R. & N. R. R., twelve miles north of Iowa City, and twenty-six miles northwest of West Liberty, and sixteen miles southeast from Cedar Rapids.

It has four churches, one school, two elevators, four general stores, a lively stable, hotel, restaurant, lumber yard, two drug stores, a furniture store and undertaker, and all other establishments usually located in smaller towns. It is quite a trading point for farmers in the vicinity.

**TIFFIN**, a village on the main line of the C. R. I. & P. R. R., eight miles northwest from Iowa City. Population 100. It has a tile factory, general store, blacksmith shop, and lumber yard.

**UNITY**, a postoffice in Union Township, nine miles southwest from Iowa City, the nearest banking and shipping point. Population 50. It has two hotels, a general store, meat market, and blacksmith shop.

**WINDHAM**, a postoffice in Hardin township, thirteen miles southwest of Iowa City. Population, 40. Has a general store, blacksmith shop, meat market, saw mill, and lively stable.

**IOWA CITY**, a city of over 10,000 inhabitants, located on the east bank of the Iowa river on a gentle slope overlooking the bluffs on the east bank of the river, which latter is already well settled, and will at no distant day become part of the city, and should in fact be now, is one of the finest residence towns of Iowa. Its wide and well-paved streets, the fine campus of the University, the many beautiful residences, and magnificent trees, make it one of the prettiest cities in Iowa.

Its main railroad connection is the C. R. I. & P. R. R., whose numerous trains make access easy, and the B. C. R. & N. R. R., which brings it in direct connection with all points north and south. It is distant from Davenport 55 miles; from Chicago, 238; from Omaha, 262; from St. Paul, 306; from St. Louis, 222 miles, having direct connection with all these points. The ground upon which it is built is gently rolling, sloping eastward toward the river, and in some places near the river the slope is rather steep. A large creek passes through the eastern part of the town, but being well controlled, it simply adds to the beauty of the scenery. The city was regularly laid out at an early day, and the streets are very wide, some being 120 feet, and most of them 80 feet and over.

The western portions adjoining the river are very picturesque, the Iowa river at this point showing on its west shore very steep bluffs, reminding one of the Palisades on a small scale, whereas the east shore is high and gently sloping, similar to the shores of the Hudson near Riverside Park, New York. Of course the gorgeous buildings so prominent along the Hudson, are not found here, but the University Building which occupy three blocks along the river in the heart of the city make a very fine showing.

North of the University grounds is the residence portion proper, although there are quite a number of fine residences south of them. All the residences are well designed and constructed, and have ample room, some of them being highly ornamental. There are also a large number of neat and tasty

flats distributed throughout the city which are mostly used as dormitories for the students of the University.

The students in fact make the life of Iowa City, and as the University itself through state aid is increasing its usefulness each year, so also the number of students is increasing until at present there are enrolled 1,450 students.

The University ranks among the best of the state institutions and should receive the liberal support of our legislators, for only by enabling our rising generation to secure an education equal to or superior to that of other nations, will we be able to fit them for the battle of supremacy now being waged among the nations of the globe.

The young men and women sent here to be educated and which are daily met on the streets of Iowa City going to or away from their studies, are the flower of the state, and in the future are sure to leave their imprint upon the pages of future history. Every now and then some bright genius in the legislature preaching economy, attempts to curtail the expenses of the University, simply to establish his reputation as a guardian of the public. We would invite him to come to Iowa City, thoroughly familiarize himself with the class of pupils and the work done by them and with the assistance of the efficient faculty, and then, if he is honest in his convictions, see if he will then advocate unreasonable economy in the management of the University. Students well educated and put upon their mettle in after life will bring more returns to the state and the country at large than any other investment the legislature can make, and the more young people are educated the larger the returns. Nearly all of the prominent men of the present generation in the state have received their education at the S. U. I.

The University is governed by a Board of Regents, of which the Governor of the State, Leslie M. Shaw, and the Superintendent of Public Instruction, Richard C. Barrett, are members ex-officio. The other member are J. D. McCleary, William D. Tisdale, W. L. Babb, George W. Cable, Alonzo Abernethy, Parker H. Holbrook, Shirley Gilliland, Hiram K. Evans, and M. A. Higley. The officers of the Board are George E. McLean, President; Lovell Swisher, Treasurer; William J. Haddock, Secretary; and Parker H. Holbrook, Alonzo Abernethy, and M. A. Higley, Executive Committee.

There are ninety professors and assistants employed at the University in the various departments. A bulletin of the University is published annually, and gives full information as to the course of study, the preparatory requirements, and the time needed to complete each course. The fall term commences on the second Wednesday in September, and closes the week preceding Christmas. The winter term commences the first week in January and closes the first week in June. Commencement exercises follow each other in regular order in the different departments.

Anyone desiring information as to the requirements for admission to the University or the course of studies in the various departments would do well to apply to the president of the Board of Regents who will gladly furnish information upon any topic desired.

The public schools also are very well conducted and highly efficient. They consist of a high school and seven grammar schools under the management of Superintendent Stevenson. The enrollment at the opening of the January term was 1,900, and the average daily attendance, 1,375. The number of teachers employed is five males and thirty-nine females.

There are numerous churches in the city, several of them fine structures, and nearly all denominations are represented.

Iowa City has a public library with a fair supply of books and very accommodating attendants. It is also the home of the State Historical Society, where many interesting documents relating to the early history of Iowa may be found. The very obliging, efficient secretary, Henry W. Lathrop, can and does furnish all other information called for relating to the early days of eastern Iowa.

There are eight newspapers published in Iowa City. The Iowa Republican, a daily evening paper, Rep. The Iowa State Press, also a daily evening paper, publishing in addition a weekly. The Iowa Citizen, a weekly Republican paper, published every Friday. The Iowa Post, a German weekly, and Iowa Banner, German weekly. The Methodist, a monthly journal, devoted to the interest of the Methodist church. The Quill, a weekly publication, and The Vidette Reporter, a tri-weekly publication, both are published by University students.

Iowa City cannot justly be called a manufacturing town, although efforts have been made to secure new factories, but for some reason or another they have not prospered. Still there are quite a number of industries that are very prosperous, among them the glove factory, the packing house, and the lately erected jewelry and organ factories, and the O. S. Kelly Mfg. Co., manufacturers of agricultural implements. The latter are located in east Iowa City, and should prove successful. The retail trade of the city is in splendid shape. The presence of over 1,450 students for a greater part of the year very materially increases the demand for clothing, gent's furnishing, furniture, and groceries. But aside from this element the farming community adjoining the city regularly deals with the merchants, and are well pleased with their treatment.

Iowa City was laid out by order of the Territorial Legislature in 1839 who ordered the commissioners that after the consent of the United States government was obtained to lay out the town of Iowa City, and plat and record the same, and that that the governor shall order lots sold.

The commissioners, after some trouble, selected Sec. 10, Twp. 79, R. 6, W. Of course the settlers around Napoleon (for there were none in the would be county seat) were very much chagrined, but Iowa City was made the territorial capital, and remained so for a number of years thereafter. Subsequently it was also made the county seat and state capital and the county also selected a piece of land and platted it, which is now known as the county seat addition.

It has a system of water works, the water being pumped from the Iowa river directly into the mains, a good electric light plant, and a fine volunteer fire department. At the annual tournaments of the volunteer departments of the state they generally capture the broom, and deservedly so.

The present city government consists of the following gentlemen: F. K. Stebbins, Mayor; W. J. Freeman, Clerk; J. E. Switzer, City Treasurer; W. H. Bailey, City Solicitor; Chas. S. Magowan, City Engineer. Aldermen: Joseph Miller, J. J. Hotz, M. J. Moon, Chas. Burger, Jno. Miller, Chas. Slavata, F. A. Heinisus, W. E. Shrader, and Lindsay. Scott Wilson, Marshal; August Leuz, Chief Fire Department.

The taxes of the city are collected by the county treasurer, and the levy last year was \$60,000. Total amount based upon an assessment of \$1,623,292, which was supposed to represent one-fourth actual value. The offices of both city and county are admirably conducted and for residence purposes few cities offer better advantages.

# ROAD LAWS OF IOWA.

**SECTION 1482. Jurisdiction over.** The board of supervisors has the general supervision of the roads in the county, with power to establish, vacate and change them as herein provided, and to see that the laws in relation to them are carried into effect.

**SEC. 1483. Width.** Roads hereafter established, unless otherwise fixed by the board, shall be at least sixty-six feet wide, and in no case less than forty, within those limits they may be increased or diminished in width, altered in direction, or vacated, by pursuing the course herein prescribed.

**SEC. 1484. Petition.** Any person desiring the establishment, vacation or alteration of a road shall file in the auditor's office of the proper county a petition, in substance as follows:

To the board of supervisors of ..... county:  
The undersigned asks that a road commencing at ..... and running thence ..... and terminating at ..... be established, vacated, or altered (as the case may be).

**SEC. 1485. Bond.** Before filing such petition, the auditor shall require the petitioner to give a bond, with sureties to be approved by him, conditioned that all expenses growing out of the application will be paid by the obligors, in case the contemplated road is not finally established, altered or vacated, as asked in the petition.

**SEC. 1486. Commissioner.** When the foregoing requirements have been complied with, the auditor shall appoint some suitable and disinterested elector of the county as commissioner, to examine into the expediency of the proposed establishment, alteration or vacation, and report accordingly.

**SEC. 1487. Expediency.** The commissioner is not confined to the precise matter of the petition, but may inquire and determine whether that or any road in the vicinity answers the same purpose and in substance the same be required; but no road shall be established through any burying-ground, nor through any garden, orchard, or ornamental ground contiguous to any dwelling-house, or so as to cause the removal of any building, without the consent of the owner.

**SEC. 1488. Report.** In forming his judgment, he must take into account the public and private convenience, and the expense of the proposed road, and, if he thinks the public convenience requires it, shall proceed at once to lay the same out, if the circumstances are such as to enable him to do so without having the same surveyed; but if, in his judgment, such road should not be established, or the alteration or vacation made, he shall proceed no further, and in either case shall, within thirty days after the day of his appointment, file his report in the auditor's office.

**SEC. 1489. Survey made—commissioner sworn.** If the precise location of the road cannot otherwise be given, he must cause the line thereof to be surveyed and plainly marked out, and if he is a person other than the county surveyor, must be sworn to faithfully and impartially discharge his duty, and after the surveying, he shall have authority to swear any assistants employed, to faithfully and impartially perform their duties in aiding him in laying out or altering the road.

**SEC. 1490. Mile posts and stakes.** Mile posts must be set up at the end of every mile, and the distance marked thereon, and stakes must be set at each change of direction, on which shall be marked the bearings of the new course. Stakes must also be set at the crossing of fences and streams, and at intervals in the prairie not exceeding a quarter of a mile each; in the timber the course must be indicated by trees suitably blazed.

**SEC. 1491. Bearing trees—monuments.** Bearing trees must, when convenient, be established at each angle and mile post, and the position of the road relative to the corners of sections, the junction of streams, or any other natural or artificial monument or conspicuous object, must, as far as convenient, be stated in the field notes and shown on the plat.

**SEC. 1492. Plat and field notes.** A correct plat of the road or alteration, together with a copy of the field notes of the surveyor, if one has been employed, must be filed as a part of the commissioner's report.

**SEC. 1493. Report—objections—claims for damages.** If the commissioner's report is in favor of the establishment, alteration or vacation of the road, it shall show the number of bridges required, and the probable cost thereof; and the auditor shall appoint a day, not less than sixty nor more than ninety days from such time, when the petition and report will be acted upon, on or before which day all objections to the establishment, alteration or vacation of the road, and all claims for damages by reason of its establishment or alteration, must be filed in the auditor's office.

**SEC. 1494. Day fixed.** The time for the commissioner to commence the examination shall be fixed by the auditor, and if he fails to so commence, or so report as prescribed in the preceding section, the auditor may fix another day, or extend the time for making such report, or may appoint another commissioner.

**SEC. 1495. Notice served.** Within twenty days after the day is fixed by the auditor as above provided, a notice shall be served on each owner of land lying in the proposed road, or abutting thereon, as shown by the transfer books in the auditor's office, who resides in the county, in the manner provided for the service of original notices. If the owner of the land as thus shown does not reside in the county, similar notice shall be served upon any person who is in actual occupancy of such land. In any case, notice shall be published for four weeks in some newspaper printed in the county. The notice may be in the following form:

To all whom it may concern: The commissioner appointed to locate, vacate, or alter (as the case may be) a road commencing at ..... in ..... county, running thence (describe in general terms all the points as in the commissioner's report, giving the names of the owners of the land through which the proposed road passes as they appear upon the transfer books of the auditor's office), and terminating at .... has reported in favor of the establishment, vacation, or alteration thereof, and all objections thereto, or claims for damages, must be filed in the auditor's office on or before noon of the ..... day of ..... A. D. .... or such road will be established, vacated or altered without reference thereto.

.....  
County Auditor.

**SEC. 1496. Auditor may act—approved by board.** If no objections or claims for damages are filed on or before noon of the day fixed therefor, and the auditor is satisfied the provisions of the preceding section have been

complied with, he shall proceed to establish, alter or vacate such road as recommended by the commissioner, upon the payment of costs. If such costs are not paid within ten days, the auditor shall report his action in the premises to the board of supervisors at its next session, who may affirm the action of the auditor, or establish such road at the expense of the county.

**SEC. 1497. New notice given.** If the auditor is satisfied that the notice has not been given, he shall appoint another day, and cause such notice to be served or published as required in the first instance, and thereafter proceed as provided above.

**SEC. 1498. Objections or claims.** If objections to the establishment of the road or claims for damages are filed, the further hearing of the application shall stand continued to the next session of the board of supervisors held after the commissioners appointed to assess the damages have reported. All claims for damages and objections to the establishment, alteration or vacation of the road must be in writing, and the statements in the application for damages shall be considered denied in all subsequent proceedings.

**SEC. 1499. Appraisers appointed.** Upon the expiration of the time for filing claims for damages, if any are filed, the auditor shall appoint three disinterested electors of the county as appraisers, to assess the amount of damages any claimants may sustain by reason of the establishment or alteration of such road, and shall give them notice of their appointment, and fix a day and hour at which they shall meet at his office, or that of some justice of the peace, to qualify; and if they do not all appear at the time and place named, or within one hour thereafter, the auditor or justice, as the case might be, shall fill any vacancies by the appointment of others, and swear such appraisers to faithfully and impartially assess the damages claimed. Such appraisers shall proceed at once to perform their duties, and, after assessing the damages sustained by the claimants, respectively, shall report the amount sustained by each, in writing, to the auditor, within thirty days from the date of their appointment.

**SEC. 1500. Postponement—costs.** Should the report not be filed in time, or should any good cause for delay exist, the auditor may postpone the time for final action on the subject, and may, if necessary, appoint other appraisers. Should no damages be awarded the applicants therefor, all the costs growing out of their claims shall be paid by them.

**SEC. 1501. Final action.** When the time for final action arrives, the board may hear testimony, receive petitions for and remonstrances against the establishment, vacation or alteration, as the case may be, of such road, and may establish, vacate or alter, or refuse to do so, as in their judgment, founded on the testimony, the public good may require. Said board may increase or diminish the damages allowed by the appraisers, and may make such establishment, vacation or alteration conditioned upon the payment, in whole or in part, of the damages awarded, or the expenses in relation thereto.

**SEC. 1502. Unconditional order.** In the latter case, a day shall be fixed for the performance of the condition, which must be before the next session of the board, and, if the same is not performed by that day, it shall at such session make some final and unconditional order in the premises.

**SEC. 1503. Record.** Any order made or action taken in the establishment, alteration or vacation of a road shall be entered in the road record, distinguishing between those made or taken by the auditor and those by the board of supervisors.

**SEC. 1504. Plat and field notes recorded—road opened.** After a road has been finally established or altered, the plat and field notes must be recorded by the auditor, who shall certify the same to the township clerk, and the supervisors of roads shall be directed by him to have the same opened and worked, subject to the provisions of the next section.

**SEC. 1505. Fences—crops.** A reasonable time must be allowed to enable the owners of land to erect the necessary fences adjoining the new road; and when crops have been planted or sowed before the road is finally established, the opening thereof shall be delayed until the crop is harvested.

**SEC. 1506. Minors—insane persons.** The rights and interests of minors and insane persons in relation to the establishment, vacation and alteration of roads, and all matters connected therewith, are under the control of their guardians.

**SEC. 1507. Streets in villages.** All public streets of villages are a part of the road; and all road supervisors or persons having charge of the same, in the respective districts or villages, shall work the same as provided by law.

**SEC. 1508. In cities or towns.** Such portions of all roads as lie within the limits of any city or town shall conform to the direction and grade and be subject to all regulations of other streets in such town or city.

**SEC. 1509. By trustees of state institutions.** The trustees or commissioners of the institutions belonging to the state may vacate, alter, change or establish public highways through the lands belonging to the state, and for the use of such institutions, as the said board of trustees or commissioners may deem for the best interests of the state and public, subject, however, to the approval of the board of supervisors of the county, or the city council of the city, wherein such lands are situated.

**SEC. 1510. County line roads.** The establishment, vacation or alteration of a road, either along or across a county line, may be effected by the concurrent action of the respective boards of supervisors in the manner above prescribed. The commissioners in such cases must act in concert, and the road shall not be established, vacated or altered in either county until it is so ordered in both.

**SEC. 1511. General control—concurrent action.** All roads, whether established by the trustees of state institutions under the statute or by the county authorities, are subject to the provisions of this chapter, and those established by the joint action of boards of supervisors of two or more counties can be altered or discontinued only by the joint action of the boards of the counties in which situated. Subject to these provisions, they shall be in all other respects treated, managed and controlled as provided in this title. The term "road," as used in this code means any public highway, unless otherwise specified.

**SEC. 1512. Consent highways.** Roads may be established without the appointment of a commissioner, if the written consent of all the owners of the land to be used for that purpose be first filed in the auditor's office; and the

board, if satisfied that the proposed road is of sufficient public importance to be opened and worked by the public, shall make an order establishing the same. If a survey is necessary, the board, before ordering the same, may require the parties asking such establishment to pay or secure the payment of the expenses thereof.

**SEC. 1513. Appeal—from what taken.** Any applicant for damages caused by the establishment or alteration of any road may appeal from the final decision of the board to the district court of the county in which the land lies, notice of which appeal must be served on the county auditor within twenty days after the decision is made. If the road has been established or altered on condition that the petitioners therefor pay the damages, such notice shall be served on the four persons first named in the petition, if there be that many residing in the county, in the manner in which an original notice may be served.

**SEC. 1514. By petitioner.** An appeal may be taken by the petitioner as to the amount of damages, if the establishment or alteration has been made conditional upon paying the damages, by serving notice thereof on the county auditor and applicant for damages, in the manner in which original notices are served, and within twenty days after the decision of the board, and filing a bond in the office of such auditor, with sureties to be approved by him, conditioned for the payment of all costs occasioned by such appeal, if the appellant fails to recover a more favorable judgment in the district court than was allowed him by such board.

**SEC. 1515. Transcript filed.** When an appeal has been taken, the auditor shall, within ten days thereafter, make out and file in the office of the clerk of said court a transcript of the papers on file in his office, and proceedings of the board of supervisors in relation to such damages. The claimant for damages shall be plaintiff and the petitioners defendants, except the damages have been ordered paid out of the county treasury, in which case the county shall be defendant.

**SEC. 1516. Proceedings in court.** The amount of damages the claimant is entitled to shall be ascertained by the court in the same manner as in actions by ordinary proceedings, and the amount ascertained shall be entered of record, but no judgment rendered therefor. The amount thus ascertained shall be certified by the clerk to the board of supervisors, who shall thereafter proceed as if such amount had been by it allowed the claimant as damages.

**SEC. 1517. Costs.** If the appeal be taken by the petitioners, they shall pay the costs, unless the claimant recovers a less amount than was allowed them by the board. In all other cases the taxing of the costs shall rest in the discretion of the court.

**SEC. 1518. Lost field notes—resurvey.** When, by reason of the loss or destruction of the field notes of the original survey, or of defective surveys or record, or of numerous alterations since the original survey, the location of any road cannot be accurately determined, the board of the proper county may cause it to be resurveyed, platted and recorded, as hereinafter provided.

**SEC. 1519. Plat and field notes filed—notice given.** A copy of the field notes, together with the plat of any road surveyed under the provisions of the preceding section, shall be filed in the office of the county auditor, and thereupon he shall give notice, in some newspaper published within the county, that at some term of the board therein named, not less than twenty days from the publication, it will, unless good cause be shown against so doing, approve of such survey and plat, and order them to be recorded as in cases of the original establishment of a public road.

**SEC. 1520. Proceedings—record.** In case objection shall be made by any person claiming to be injured by the survey so made, the board shall have power to hear and determine the matter, and may, if thought advisable, order a change to be made in the survey. If, upon the final determination, the board shall find said survey is correct, it shall approve the same, and cause the field notes and plat thereof to be recorded as in case of the establishment or alteration of roads, and thereafter such records shall be received by all courts as conclusive proof of its establishment according to such survey and plat.

**SEC. 1521. Road plat book.** If the same has not been heretofore done, the county auditor shall cause every road in his county, the legal existence of which is shown by the records and files in his office, to be platted in a book to be obtained and kept for that purpose and known as the "road plat book." Each township shall be platted separately, on a scale of not less than four inches to the mile, and such auditor shall have all changes in or additions to the roads legally established immediately entered upon said plat book, with appropriate references to the files in which the papers relating to the same may be found. The auditor shall, from time to time, notify the clerk of each township of all changes made in the roads thereof, and on receipt of such notice he shall immediately make corresponding changes on the highway plat book in his office, and shall, in case such plat book is lost or is found to be substantially inaccurate, procure a new one, or cause corrections to be made, at a reasonable expense, to be paid out of the general township fund.

**SEC. 1522. Sidewalks on highways.** Any owner of land adjoining a public road outside the limits of a city or town may construct a sidewalk on and along said road, which shall not exceed four feet in width, and be located along the side thereof, of any material suitable for a foot-walk, but it shall not be so constructed as to interfere with the proper use and enjoyment of any lands or premises along which it is laid. The person building such walk shall keep the same in repair.

**SEC. 1523. Penalty for injury to.** Any person who shall destroy, injure, drive or ride upon a sidewalk so constructed, except at road crossings, shall be guilty of a misdemeanor, and shall be fined not less than five dollars for each offense, and shall be liable to the party who has built or maintained said sidewalk for all damages caused thereby.

**SEC. 1524. Cattle-ways across highways.** Upon application to the board of supervisors of any county by any person for permission to construct a cattle-way across, over or under any public road, it may grant the same upon condition that such way shall not interfere with the public travel; that the grade of the road over the cattle-way shall not exceed one foot in ten feet; and that it shall not obstruct watering at any running stream. The applicant shall construct the same at his own expense, and be responsible for all damages that may arise from its construction, or from the same not being kept in repair.

**SEC. 1525. Repairs.** If the person on whose land such cattle-way is

constructed fails to keep the same in repair, it shall be the duty of the road supervisor to make all necessary repairs, and charge the same to the owner of the land upon which way is constructed, and, upon his refusal or failure to pay, the supervisor shall recover the same in an action brought in his own name, which money, when collected, shall be expended in improving or repairing the public roads in the road district where such cattle-way is constructed.

SEC. 1526. *Application for.* Any person desiring to build a cattle-way across a public highway, under any township bridge, may apply to the board of trustees of the township wherein the same is to be located, at any meeting thereof, and it may grant such application, and prescribe such conditions in regard to the maintenance of said bridge as it may think proper.

SEC. 1527. *Laying out public highways—fees.* The following fees shall be paid persons engaged in laying out and changing roads:

1. Commissioners, for each day, two dollars.
2. Surveyor, for each day, four dollars.
3. Chain carriers, markers, and other assistants, for each day, one dollar and fifty cents.

If the road extends into more than one county, such expenses when so adjudged shall be paid by the several counties in proportion to the length of time occupied on the road in each county.

## CHAPTER II. OF WORKING ROADS.

SECTION 1528. *Powers and duties of trustees.* The township trustees of each township shall meet on the first Monday in April, or as soon thereafter as the assessment book is received by the township clerk, and on the first Monday in November, in each year. At the April meeting, said trustees shall determine:

1. The amount of property tax to be levied for roads, bridges, guideboards, plows, scrapers, tools, and machinery adapted to the construction and repair of roads, and for the payment of any indebtedness previously incurred for road purposes, and levy the same, which shall not be less than one nor more than four mills on the dollar of the assessed value of the property for that year, which, when collected, shall be expended under the direction and order of the township trustees;
2. Whether any portion of said tax shall be paid in labor, and, if so, what portion;
3. The amount that will be allowed for a day's labor done by a man, and by a man and team, on the road. To certify to the board of supervisors the desire for an additional road tax, of not to exceed one mill, to be levied in whole or in part by the board of supervisors as hereinafter provided. At the November meeting, they may divide their respective townships into such number of road districts as may be necessary for the public good, and shall settle with the township clerk and supervisors of roads.

SEC. 1529. *General township fund—clerk to give bond—custody of implements.* The trustees shall set apart such portion of the tax provided in the preceding section as may be necessary for the purpose of purchasing the tools and machinery and paying for the guideboards mentioned therein, and the same shall constitute a general township fund; and they shall require the township clerk to give bond in such sum as they may think proper, conditioned as the bonds of the county officers, which bond and the sureties thereon, shall be approved by them. Said clerk shall have charge of and properly preserve and keep in repair such implements and machinery as may be purchased, and may determine at what time the supervisors of the several road districts may have the use of the same or any part thereof, and he shall be responsible for the safe keeping of the same, and not in the custody of some one of the supervisors, and shall receive such compensation as they shall provide, to be paid out of such fund.

SEC. 1530. *County road fund—how levied and paid out.* The board of supervisors of each county may, in the time of levying taxes for other purposes, levy a tax of not more than one mill on the dollar of the assessed value of the taxable property in its county, including all taxable property in cities and incorporated towns, which shall be collected at the same time and in the same manner as other taxes, to be known as the county road fund, and paid out only on the order of the board for work done on the roads of the county in such places as it shall determine; but so much of the county road fund as arises from property within any city or incorporated town shall be expended on the roads or streets within such city or town, or on the roads adjacent thereto, under the direction of the city or town council; and the county treasurer shall receive the same compensation for collecting this tax as he does for collecting corporation taxes. In case the board of supervisors do not make a levy for county road fund, or levy less than one mill for said county road fund, the board of supervisors shall levy such an additional sum for the benefit of such townships as desire to have a levy for such additional levy as provided for in section fifteen hundred and twenty-eight of this chapter; but the amount for the general township fund and the county road fund shall not exceed in any year five mills on the dollar.

SEC. 1531. *Expenditure.* It shall, at the regular meeting in April, determine from the auditor's and treasurer's books the amount of money collected and credited to said road tax fund. It shall also determine the manner in which said tax shall be expended, whether by contract or otherwise.

SEC. 2532. *One road district plan.* The board of township trustees, at its regular meeting in April, may consolidate the road districts thereof into one road district, and it may, at such meeting, subdivide, returning to the former plan of road work after a three years' trial of the single district system. If this system shall be adopted, the road fund, belonging to the several road districts shall at once become a general township road fund out of which all claims for work done or material furnished for road purposes prior to the change, and unsettled, shall be paid.

SEC. 1533. *Duty of trustees.* Where the one road district plan is adopted, the board of township trustees shall order and direct the expenditure of the road funds and labor belonging or owing to the township; may let, by contract, to the lowest responsible bidder, any part or all of the work on the roads for the current year, or may appoint a township superintendent of the roads, with one or more assistants to oversee, subject to the direction of the board, all or any part of the work, but it shall not incur an indebtedness for such purposes unless the same has been or shall at the time be provided for by an authorized levy; and may order the township road tax for the succeeding year paid in money and collected by the county treasurer as other taxes. It shall cause both the property and poll road tax to be equally and judiciously expended for road purposes in the entire road district; shall cause at least seventy-five per cent. of the township road tax to be thus expended by the fifteenth day of July in each year; shall cause the noxious weeds growing in the roads to be cut twice a year, when necessary, and at such times as to prevent their seeding, and it may allow any land owner a reasonable compensation for the destruction thereof, when growing in the roads abutting upon his land, and credit him therefor on his road tax for that year. A superintendent of roads and an assistant are employed, it shall fix the term of office, which shall not exceed one year, and compensation, which shall not exceed three dollars a day; and no contract shall be made without reserving the right of the board to dispense with his services at its pleasure.

SEC. 1534. *Qualification of officers.* The trustees shall require the township clerk, contractor and superintendent, contemplated in this plan, each in quality as other township officers, and to execute a bond with approved sureties for twice the amount of money likely to come into their hands respectively.

SEC. 1535. *Day's work.* Eight hours' service for a man, or man and team, shall be required for a day's work; but except on extraordinary occasions no person shall be required to go more than three miles from his place of residence to work, and, for the purposes of one road district plan, the residence of a man with a family shall be construed to be where his family resides, and for a single man, it shall be at the place where he is at work.

SEC. 1536. *Contractors and superintendents.* The powers, duties and accountability imposed on road supervisors, so far as may be, under the one road district plan, shall apply to contractors, superintendents and assistants.

SEC. 1537. *Township system takes effect.* In all cases where the one road district plan for the township shall have been adopted, it shall be competent for the township trustees to designate when the same shall take effect as to the working of the roads.

SEC. 1538. *Compensation of trustees, treasurer and clerk.* The trustees shall receive the same compensation per day for time necessarily spent in looking after the roads as they do for other township business; the county treasurer shall receive the same per cent. for collecting the road taxes here contemplated that he does for collecting corporation taxes; and the township clerk shall receive two per cent. of all the money thus coming into his hands and by him paid out for road purposes.

SEC. 1539. *Furnish plat.* The township clerk shall furnish each road supervisor a copy of the township plat furnished him by the auditor as relates to the roads in his district, and from time to time shall mark thereon the changes in or additions to such roads as the same are certified to him by the auditor, which map or plat shall be transferred to his successor in office.

SEC. 1540. *Tax list.* He shall, within four weeks after the trustees have levied the property tax, make out a tax list for each road district in his township, which shall be in tabular form and alphabetical order, having distinct columns for lands, town lots and personal property, and contain in a separate column the amount of the tax on each piece of land and town lot, and that on the amount of personal property belonging to each individual, and in another column the amount of the tax to be paid in money due from each individual. This list shall contain the names of all persons required to perform two days' labor upon the road as a poll tax. To enable him to make out such tax list, the assessor shall furnish the clerk of each township, on or before the first day of April in each year, a correct copy of the assessment lists of said township for that year, which shall be the basis of such tax list. The county auditor shall furnish the several township clerks of his county with the necessary printed blanks.

SEC. 1541. *Collection of Tax.* He shall make an entry upon such tax list, showing what road district and year it is for, and attach thereto his warrant under his hand, in general terms requiring the supervisor of such district to collect the taxes therein charged, and no informality in the above requirements shall render any proceedings for the collection of such taxes illegal. He shall cause such lists to be delivered to the proper supervisors of his township within thirty days after the levy, and take receipts therefor; and such lists shall be sufficient authority for the supervisor to collect all taxes therein charged against resident property holders in his district.

SEC. 1542. *Delinquent tax certified.* He shall on or before the second Monday in November in each year, make out a certified list of all lands, town lots and personal property on which the road tax has not been paid, and the amount of tax charged on each parcel of land, town lot or personal property, designating the district in which the same is situated, and transmit the same to the Auditor, who shall enter the amount of such tax the same as other taxes, and deliver the same to the County Treasurer, charging him therewith, which shall be collected by him in the same manner that county taxes are collected. In case the township clerk shall fail or neglect to make such return, he shall forfeit and pay to the township for road purposes a sum equal to the amount of tax on said land, which may be collected by an action on his bond.

SEC. 1543. *Taxes paid to clerk.* The county treasurer shall, on the last Monday in April and October in each year, pay to the township clerk all the road taxes belonging to his township, which are at such time in his hands, taking the duplicate receipt of such clerk therefor, one of which shall be delivered by the treasurer to the trustees on or before the first Monday in May and November in each year.

SEC. 1544. *Road taxes apportioned.* The county auditor shall provide a column in his list, in which he shall show the road districts to which the road taxes belong, and the treasurer, when he pays the same to the several township clerks, shall furnish each a statement, showing the district or districts to which the money belongs, and the amount to each.

SEC. 1545. *Supervisor—qualification.* Each road supervisor shall give bond in such sum and with such security as the township clerk may require (but in no case shall a township trustee sign such bond as surety), conditioned that he will faithfully and impartially perform all the duties required of him, and devote all moneys that may come into his hands by virtue of his office, according to law. If a vacancy occurs in any road district, the clerk shall fill the same by appointment, but no person shall be required to serve as such supervisor who is exempt from performing labor on the roads.

SEC. 1546. *Notice to penalty for refusing to serve.* Within five days after his election or appointment, the township clerk shall notify the road supervisor elected or appointed thereof, and if he shall fail to appear and qualify, as required by law, he shall forfeit and pay the sum of five dollars, and in case of refusal to pay the same his successor shall collect it by action, and apply the same to the repairing of roads in his district.

SEC. 1547. *Posting tax list.* The road supervisor shall, within ten days after receiving tax list, post up in three conspicuous places within his district written notices of the amount assessed to each taxpayer in said district.

SEC. 1548. *How tax expended.* The road supervisor shall cause all taxes collected by him to be expended for road purposes on or before the first day of November of that year, seventy-five per cent. of which shall be expended before the fifteenth day of July, except the portion set apart for a general fund, which shall be expended by him paid over to the township clerk from time to time as collected, and his receipt taken therefor.

SEC. 1549. *In each district.* The money tax levied upon the property in each district, except that portion set apart as a general township fund, whether collected by the road supervisor or county treasurer, shall be expended for road purposes in that district only.

SEC. 1550. *Who to perform labor.* The road supervisor shall require all able-bodied male residents of his district, between the ages of twenty-one and forty-five, to perform two days' labor upon the roads, between the first days of April and September of each year.

SEC. 1551. *Notice of time and place—receipts.* The road supervisor shall give at least three days' notice of the day or days and place to work the roads

to all persons subject to work thereon, or who are charged with a road tax within his district, and all persons so notified must meet him at such time and place, with such tools, implements and teams as he may direct, and labor diligently under his direction for eight hours each day; and for such two days' labor the supervisor shall give him a certificate, which shall be evidence that he has performed such labor on the public roads, and exempt him from performing labor in payment of road poll tax in that or any other road district for the same year. The road supervisor shall give any person who may perform labor in payment of his road tax a receipt, showing the amount of money earned by such labor, which shall be evidence of the payment of said tax to the amount specified in the receipt.

SEC. 1552. *Penalty for failure to attend or work.* Each person liable to perform labor on the roads as poll tax, who fails to attend, either in person or by satisfactory substitute, at the time and place directed, with the tools, implements or teams required, having had three days' notice thereof, or, appearing, shall spend his time in idleness, or disobey the road supervisor, or fail to furnish him, within five days thereafter, some satisfactory excuse for not attending, shall forfeit and pay him the sum of three dollars for each day's delinquency; and in case of failure to pay such forfeit within ten days, he shall recover the same by action in his name as supervisor, and no property or wages belonging to such person shall be exempt from execution therefor. Such action shall be before any justice of the peace in the proper township. The money, when collected, shall be expended on the public roads.

SEC. 1553. *Compensation of supervisor.* The road supervisor shall be allowed and receive for his services, per diem, for each day's labor, including the time necessarily spent in notifying the hands and making out his returns, which sum shall be paid out of the road fund, after deducting his two days' work. When there is no money in the hands of the clerk with which to pay him, he shall be entitled to receive a certificate for the amount of labor performed, which shall be received in payment of his own road tax for any succeeding year.

SEC. 1554. *Report.* The supervisors of the several districts of each township shall report to the township clerk on the first Monday of April and November of each year, which report shall embrace the following items:

1. The names of all persons in his district required to perform labor on the public road, and the amount performed by each;
2. The names of all persons against whom actions have been brought, and the amount collected of each;
3. The names of all persons who have paid their property road tax in labor, and the amount paid by each;
4. The names of all persons who have paid their property tax in money, and the amount paid by each;
5. A correct list of all lands and town lots belonging to non-residents of the district on which the road tax has been paid, and the amount paid by each;
6. A correct list of all lands and town lots belonging to non-residents of the district on which the road tax has not been paid, and the amount on each piece;
7. The amount of all moneys coming into his hands by virtue of his office, and from what sources;
8. The manner in which moneys coming into his hands have been expended, and the amount, if any, in his possession;
9. The number of days he has been employed in the discharge of his duty;

The condition of the roads in his district and such other items and suggestions as he may wish to make, which report shall be signed and sworn to by him, and filed by the township clerk in his office.

SEC. 1555. *Tax certified and collected.* If it appears from such report that the road supervisor has neglected to perform his duty, or any part thereof, and that the road supervisor has neglected to collect the amount in money required to be paid in case of such failure, the clerk shall add the amount required to be paid to such person's property tax, and certify the same to the auditor, who shall enter it on the proper tax list, and the treasurer shall collect the same.

SEC. 1556. *Shade trees—timber—drainage.* The road supervisor shall not cut down or injure any tree growing by the wayside which does not obstruct the road, or which stands in front of any town lot, inclosure or cultivated field, or any ground reserved for any public use, and shall not enter upon any lands for the purpose of taking timber therefrom without first receiving permission from the owner or owners of said lands, nor destroy or injure the ingress or egress to any property, or turn the natural drainage of the surface water to the injury of adjoining owners; but it shall be the duty of the supervisor to use formed ditches and drains for the purpose of carrying the surface water from the public road in its natural channel, and to this end he may enter upon the adjoining lands for the purpose of removing obstructions from such natural channel that impede the flow of such water.

SEC. 1557. *Liability for unsafe bridge or highway.* When notified in writing that any bridge or portion of the public road is unsafe, the road supervisor shall be liable for all damages resulting therefrom, after allowing a reasonable time for repairing the same. If there is in his district any bridge erected or maintained by the county, he shall, on receiving written notice of its unsafe condition, obstruct the passage thereon, and notify at least one member of the board of supervisors, in writing, of its condition. If he fails to obstruct and notify, he shall be liable for all damages growing out of the unsafe condition thereof, occurring after the time he is so notified and while he neglects to obstruct such passage. Any person who shall remove such obstruction shall be liable for all damages occurring to any person resulting therefrom, but nothing herein contained shall be construed to relieve the county from liability for the defects of said bridge.

SEC. 1558. *Extraordinary repairs.* For making such repairs as are required in the preceding section, the road supervisor may call out any or all able-bodied men of the district in which they are to be made, but not more than two days at one time without their consent, and persons so called out shall be entitled to receive a certificate from him of the number of days' labor performed, which shall be received in payment for road tax for that or any succeeding year, at the rate per day established for that year.

SEC. 1559. *Penalty.* Any able-bodied man, duly summoned, who fails to appear and labor by himself or substitute, or send satisfactory excuse therefor, or pay the value thereof in money before an action is brought, shall forfeit and pay ten dollars, to be recovered in an action in the name of the road supervisor, and for the use of the road fund of the district.

SEC. 1560. *Obstructions removed.* The road supervisor shall remove all obstructions in the roads, but must not throw down or remove fences which do not directly obstruct travel, until notice in writing, not exceeding six months, has been given to the owner of the land inclosed in part by such fence.

SEC. 1561. *Condition—guideboards.* The road supervisor shall keep the roads in as good condition as the funds at his disposal will permit, and shall place guideboards at cross roads and at the forks of the roads in his district, which shall be made out of good timber, well painted and lettered, and placed upon good substantial hard-wood posts, to be set four feet in, and at least eight feet above, ground.
